Employment History:

Coventry Health Care – First Health/Production Support
June 2007 to Present

Position: Production Consultant

Responsibilities: Maintain functionality of production programs and scripts on various servers including AIX, Novell, Redhat, Tru64, Windows, and VMS. Combined korn shell and perl shell scripts to parse data and log files and find problems with every day programs. Also used perl with pdf, excel, and ftp capabilities to deliver reports and data files to end users.

Weber State University - Network Management/Computing Support
Nov 2004 to June 2007

Position: Computer Center Technician

Responsibilities: Maintain VMS, Unix, Novell, Window Servers, NetMail, GroupWise. Maintain and program FileMaker Pro/Web applications. Assist with nightly backup of critical WSU data. Maintain and assist with MySQL, DNS, SNORT, Email, squid, and Web Servers. Keep area secure and manage AC units. Assist faculty, staff, and students with various computer issues via phone support. Provide back-up support and assistance to network and operations staff.

Weber State University - Computing Support

May 1997 to Nov 2004

Position: Computer Support Technician

Responsibilities: Maintained FileMaker and MySQL Databases with web front-end. Supported and managed Novell, Windows, and Unix file and web servers. Assist WSU students and faculty with computer-related uses, including STAARS and Banner programs, logins, system failures, and hardware-software related issues. Install and configure new computers. Provided technical support and training to all new computer technicians. Answer helpdesk calls, including troubleshooting issues over the phone.

May 1995 to May 1997 – Volunteer service in Brazil
